Project for Public Space

Transportation

Roadway
expansion is our
primary weapon
against
congestion

TO MAKE THIS MORE
EFFICIENT, SHOULD I ADD TWO MORE
OR FOUR MORE LANES?

JFIT: Future in Transportation

Principle

Downsize state highway to be affordable

Leverage Private sector investment

Network Connectivity

Help Communities With Land Use Design

Context Sensitive Street Design

Range of Strategies

Capital

- 
- Land use
 - Minor operational improvements
 - Bus service
 - TDM
 - Access management
 - Local street networks
 - Major Operational improvements/ITS
 - Road widening, grade separation, bypass
 - Fixed guideway transit

KEY:

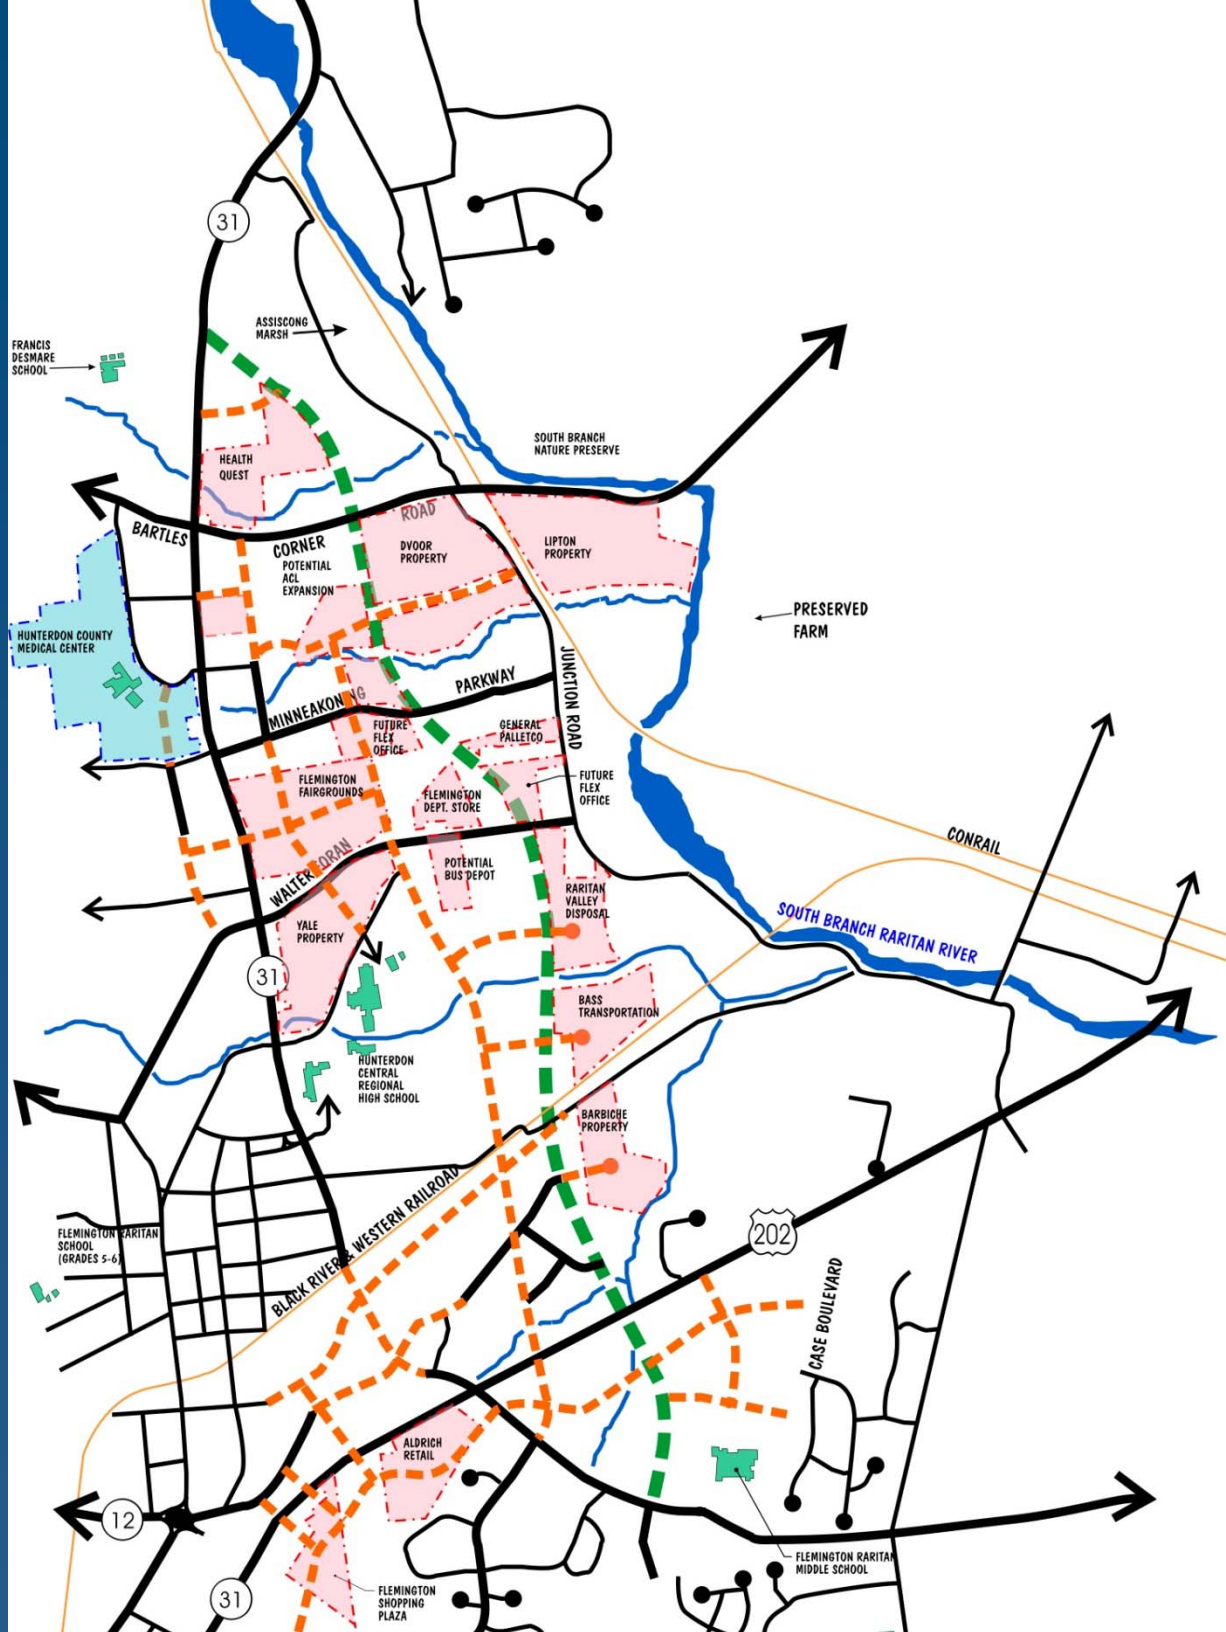

★ Transit Village

Case Study: Rt. 31 Flemington, NJ

- 4 lane grade separated freeway in blue
- \$ 125-150 million

- Laid Out an Extended Local Street Grid
- Support the State Highways

COMMUNITIES ON

Comments on

- Allow future development while protecting the character of the Park
- Plan for limited connection to Parkway
- Organize development pattern into streets and blocks
- New site development standards that focus on the street & pedestrian environment

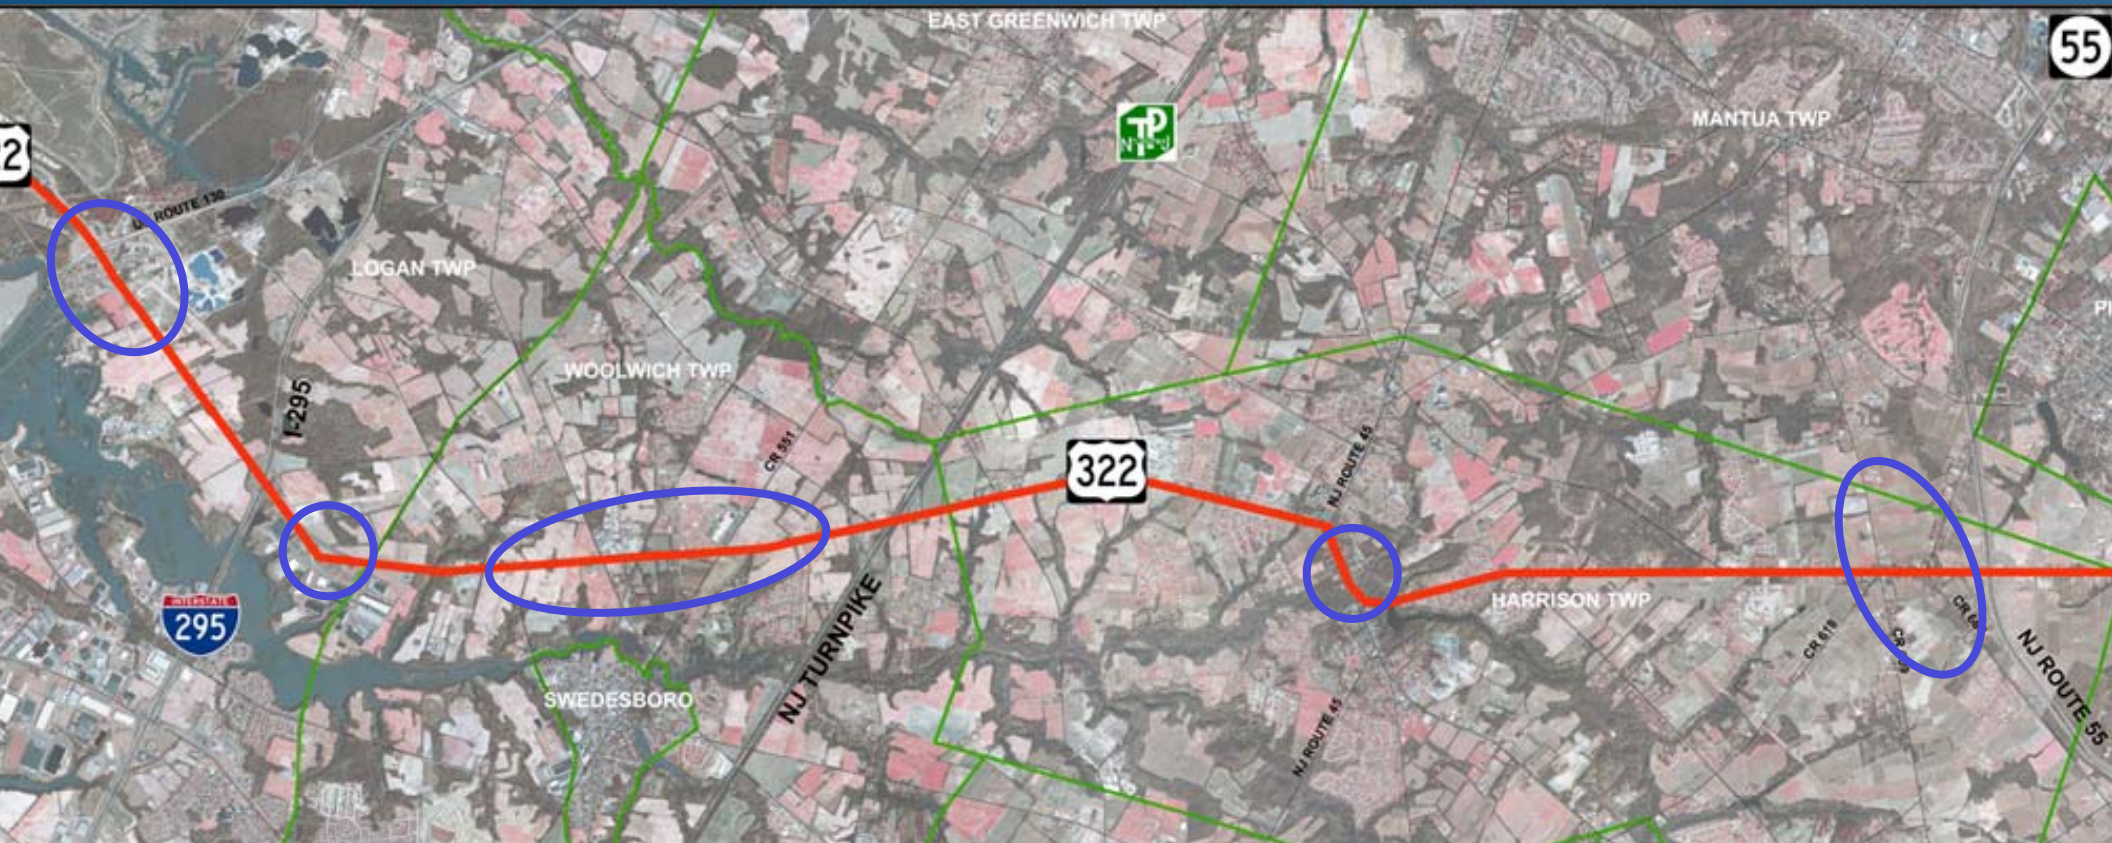

• Revised project including local government funding of \$10 million, of which \$5 million will be provided by development

SOUTH BRANCH PARKWAY
CROSS-SECTION

Study

- Towns have agreed to concentrate development in centers in order to preserve land, increase walkability, and make transit service more viable

Corridor approach

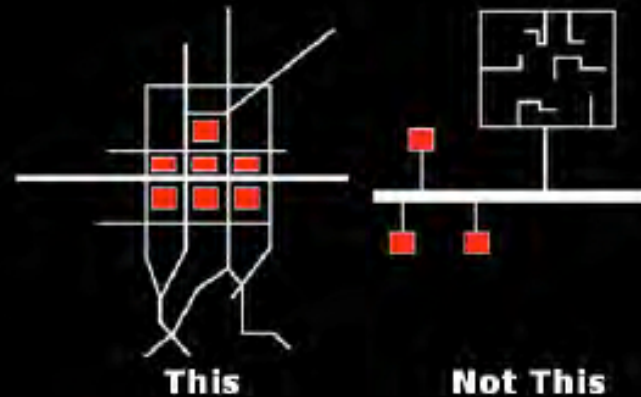

Looking for a network of solutions, not one big one

Figure 1.4 Benefits of Network

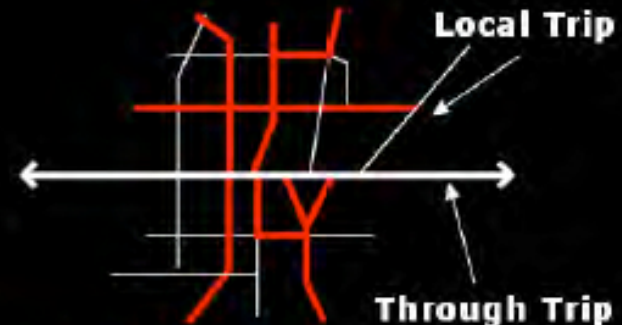

Efficiency:

Dense networks outperform the same number of lanes in few, large roads.

Community Building:

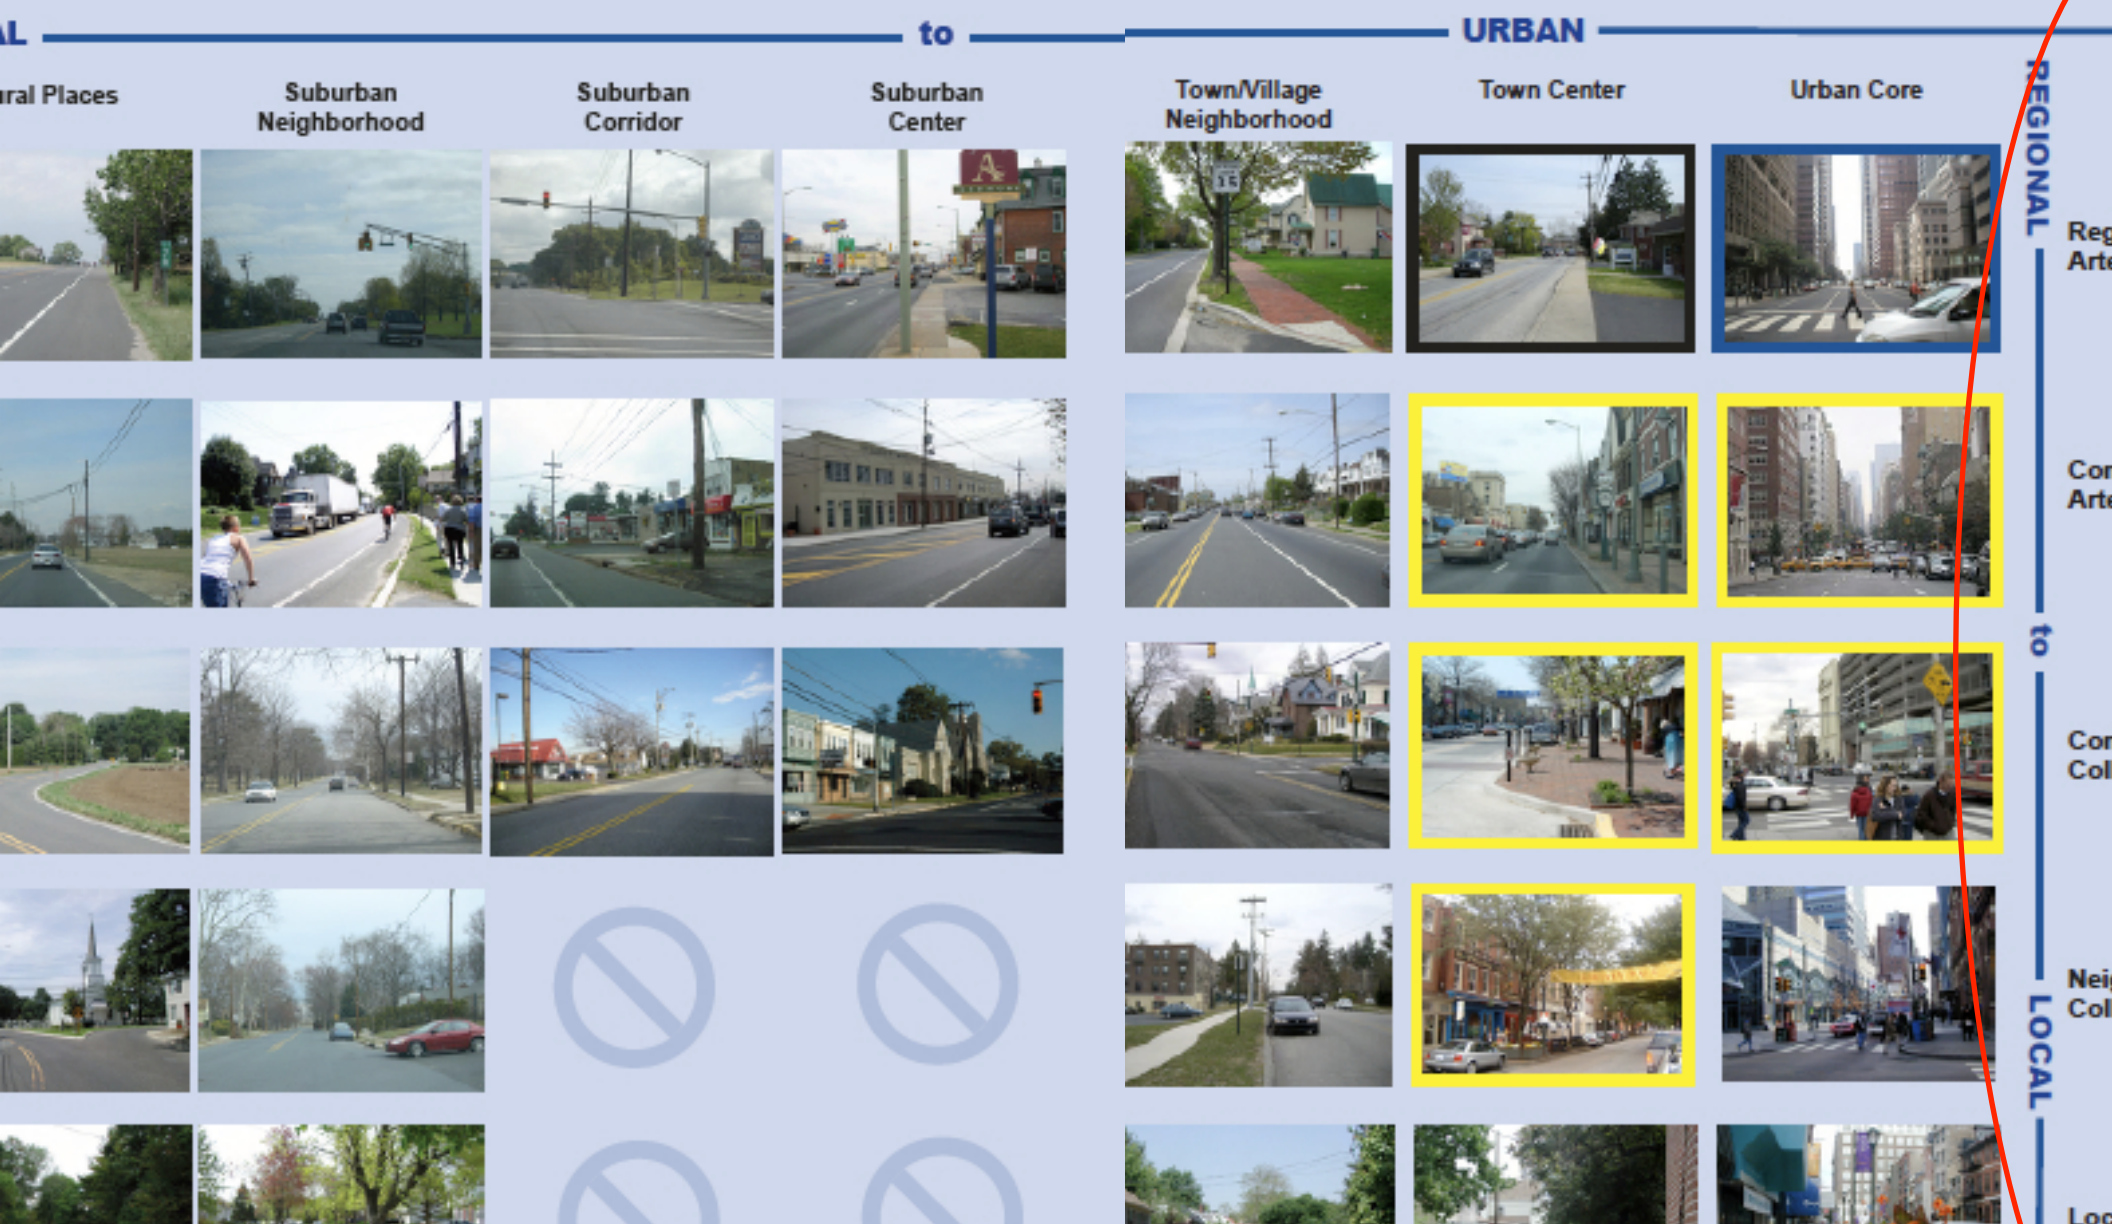

Network is framework for new communities, and for turning sprawl to community

Beneficiaries:

One Size Does not Fit All

Solutions Based on all Contexts

One Size Does not Fit All

Designs Flex to Transportation and Community Context

Table 6.2 Matrix of Design Values

Regional Arterial		Rural	Suburban Neighborhood	Suburban Corridor	Suburban Center	Town/Village Neighborhood	Town/Village Center	Urban Core
Roadway	Lane Width ¹	11' to 12'	11' to 12' (14' to 15' outside lane if no shoulder or bike lane)	11' to 12' (14' to 15' outside lane if no shoulder or bike lane)	11' to 12' (14' outside lane if no shoulder or bike lane)	10' to 12' (14' outside lane if no shoulder or bike lane)	10' to 12' (14' outside lane if no shoulder or bike lane)	10' to 12' (14' outside lane if no shoulder or bike lane)
	Paved Shoulder Width ²	8' to 10'	8' to 10'	8' to 12'	4' to 6' (if no parking or bike lane)	4' to 6' (if no parking or bike lane)	4' to 6' (if no parking or bike lane)	4' to 6' (if no parking or bike lane)
	Parking Lane ³	NA	NA	NA	8' parallel	8' parallel; see 7.2 for angled	8' parallel; see 7.2 for angled	8' parallel
	Bike Lane	NA	5' to 6' (if no shoulder)	6' (if no shoulder)	5' to 6'	5' to 6'	5' to 6'	5' to 6'
	Median	4' to 6'	16' to 18' for LT; 6' to 8' for pedestrians only	16' to 18' for LT; 6' to 8' for pedestrians only	16' to 18' for LT; 6' to 8' for pedestrians only	16' to 18' for LT; 6' to 8' for pedestrians only	16' to 18' for LT; 6' to 8' for pedestrians only	16' to 18' for LT; 6' to 8' for pedestrians only
	Curb Return	30' to 50'	25' to 35'	30' to 50'	25' to 50'	15' to 40'	15' to 40'	15' to 40'
	Travel Lanes	2 to 6	2 to 6	4 to 6	4 to 6	2 to 4	2 to 4	2 to 6
Roadside	Clear Sidewalk Width	NA	5'	5' to 6'	5' to 6'	6' to 8'	6' to 10'	6' to 12'
	Buffer ⁴	NA	6'+	6' to 10'	4' to 6'	4' to 6'	4' to 6'	4' to 6'
	Shy Distance	NA	NA	NA	0' to 2'	0' to 2'	2'	2'
	Total Sidewalk Width	NA	5'	5' to 6'	9' to 14'	10' to 16'	12' to 18'	12' to 20'
Speed	Desired Operating Speed	45-55	35-40	35-55	30-35	30-35	30-35	30-35

1 12' preferred for regular transit routes, and heavy truck volumes > 5%, particularly for speeds of 35 mph or greater.

2 Shoulders should only be installed in urban contexts as a retrofit of wide travel lanes to accommodate bicyclists.

3 Buffer is assumed to be planted area (grass, shrubs and/or trees) for suburban neighborhood and corridor contexts; street furniture/car door zone for other land use contexts.

One Size Does not Fit All

Addressing Community Context

Road Transect from Urban Core to Rural

Figure 6.2 Roadway and Building Transect from Urban Core to Rural Contexts

Building Transect from Urban Core to Rural

Rethinking Speed

Conventional Design

Why Gateway-1

- To resolve mounting tensions over the demands on Route 1 as regional arterial vs. local Main Street and country road
- To align land use and transportation decisions and decision processes
- Working together vs against each other

Product

A **POLICY PLAN** that:

- Guides MaineDOT decisions in Mid-coast
- Is incorporated into local comp plans and land use ordinances
- Changes *how* land use and transportation decisions are made:
 - MaineDOT decisions
 - Inter-Local land use decisions

Tools for Change

Manage Traffic

Enhance Infrastructure

Design the Corridor

Change Land Use Plans, Policies & Regs

Reform governance of Land Use & Transportation

Through incentives

Some Tools not typical of
DOT's to introduce – why

Tools for the Context

- A regional TDR system
- Partnering with land trust to buy land with high value and high access management value?
- Site plan review & design standards?
- Zoning for compact/mixed use?
- Tax base sharing / sharing business parks?

Tools for the Context

Character

Aesthetics & Function

Zoning

Design review

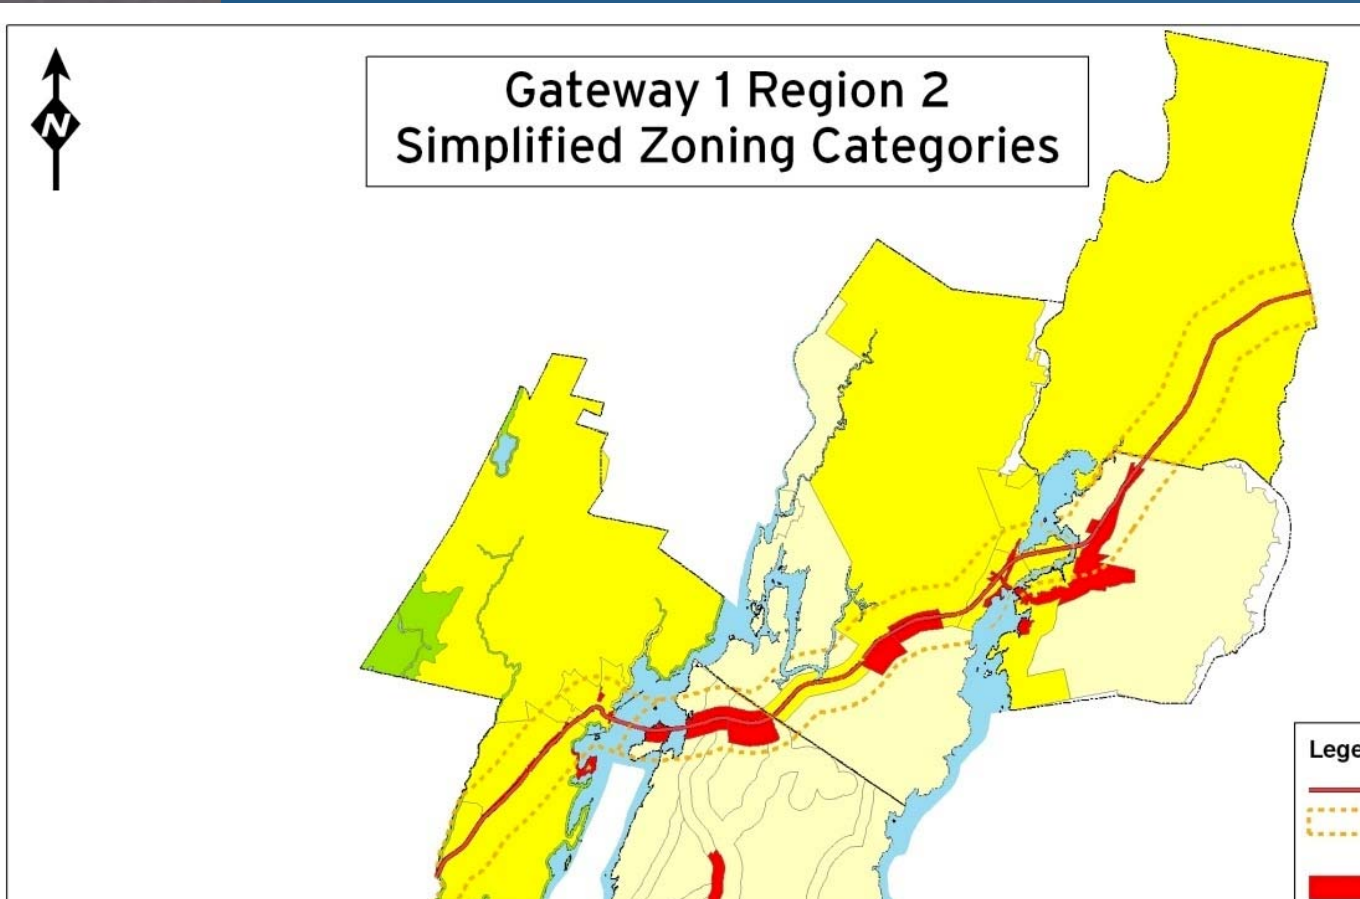

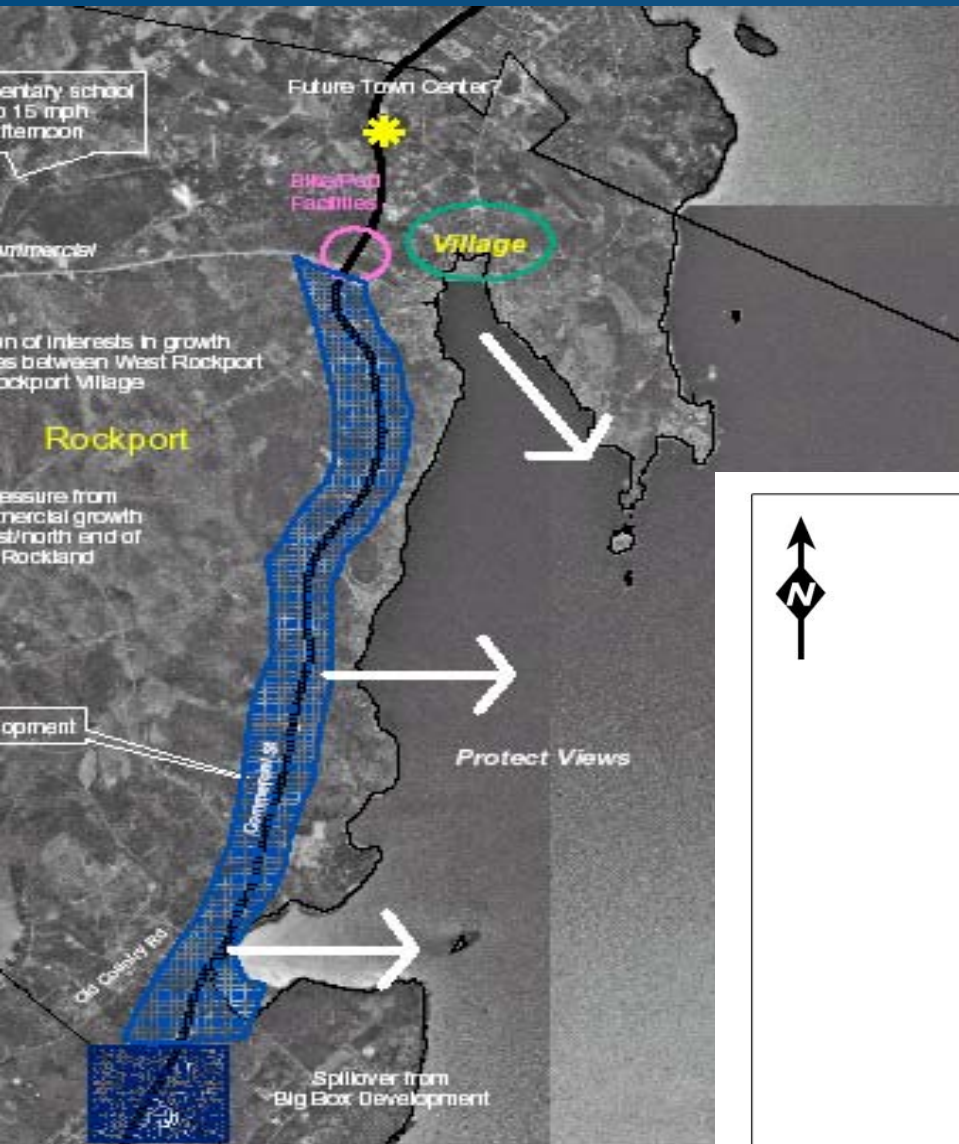

Development Standards

Transportation options & sensitive designs

Are local tools in place to protect public infrastructure

Understanding the Community Context

Phase I

NO SOLUTIONS

Current Status of Gateway One

Engineering Committee voted to adopt plan

12 towns have adopted start up agreement

Release \$500k in TA to integrate gl into local plans

12 months to sign interlocal agreement

Release \$1.3m in project \$

Prioritize projects for DOT w/ some exception

Possible future corridor allocation

How to provide mobility and support

Smart Growth?

Manage Traffic

Enhance Infrastructure -- i.e. the Grid!

Plan and Design the Whole Corridor

Deal with Land Use!

Integrate Land Use & Transportation

Respect the Natural Environment

Involve all stakeholders
