

# Adapting Cities to WaterWorld- Smart Growth Techniques for Rainwater Management

12<sup>th</sup> Annual Partners for Smart  
Growth Conference

February 8, 2013

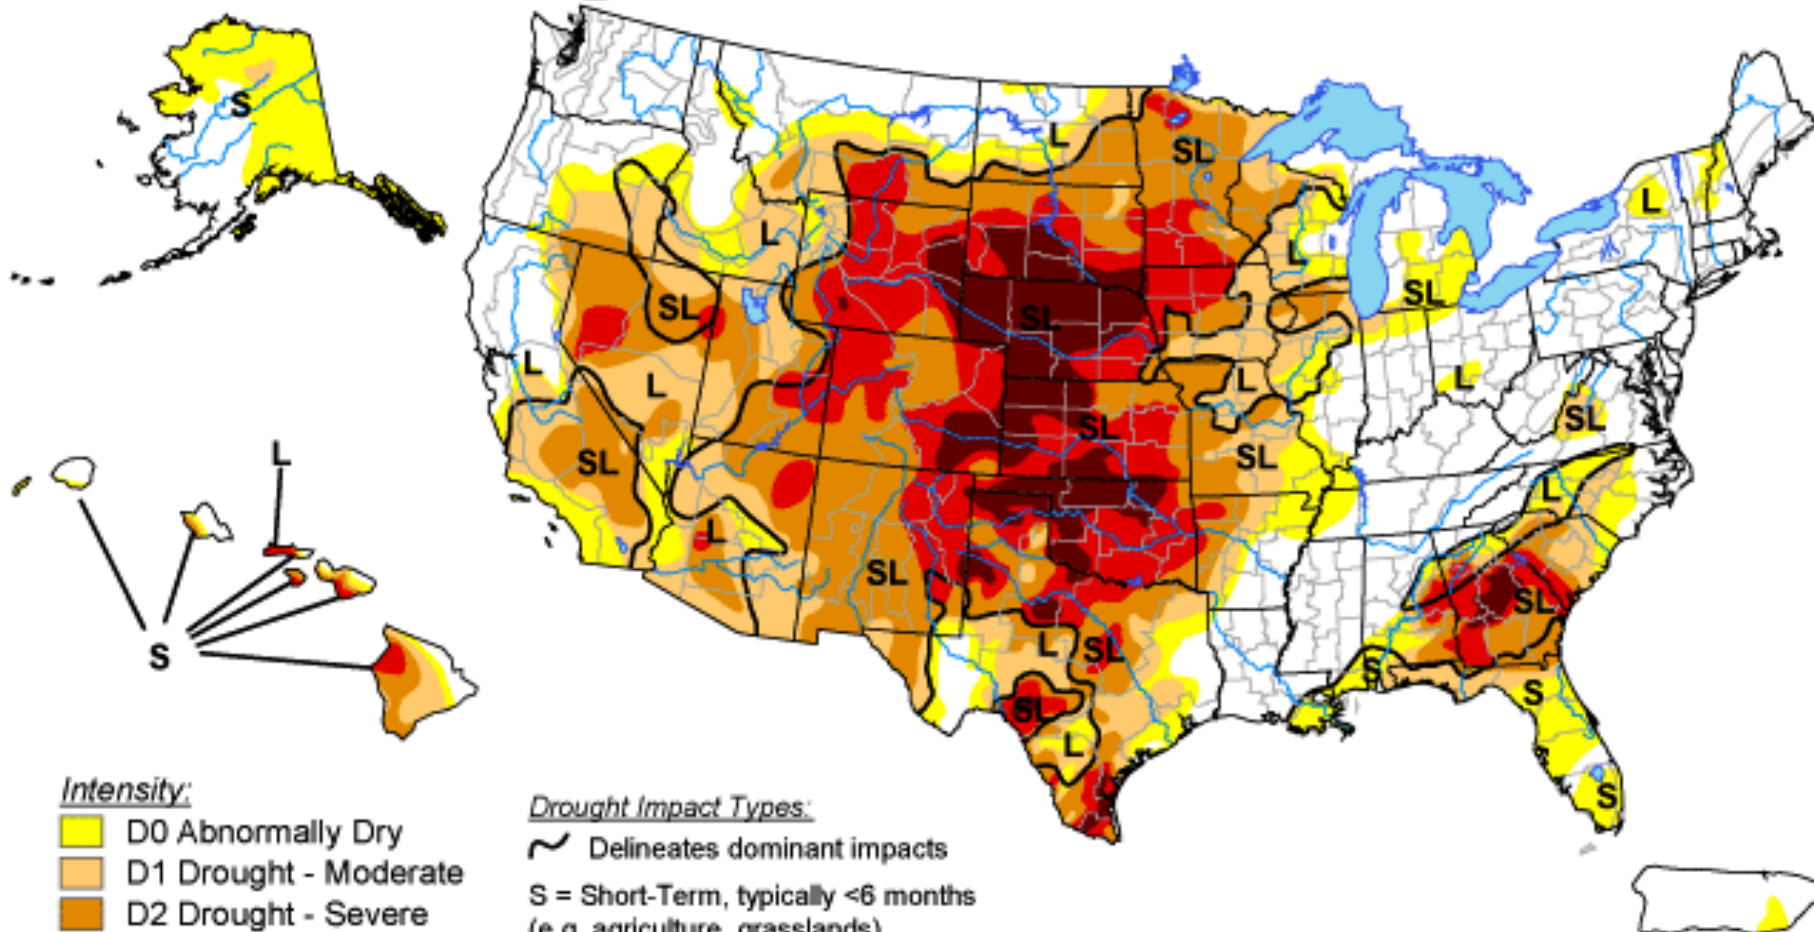

# U.S. Drought Monitor

January 29, 2013  
Valid 7 a.m. EST

## Intensity:

-  D0 Abnormally Dry
-  D1 Drought - Moderate
-  D2 Drought - Severe
-  D3 Drought - Extreme
-  D4 Drought - Exceptional

## Drought Impact Types:

-  Delineates dominant impacts
- S = Short-Term, typically <6 months  
(e.g. agriculture, grasslands)
- L = Long-Term, typically >6 months  
(e.g. hydrology, ecology)

The Drought Monitor focuses on broad-scale conditions.  
Local conditions may vary. See accompanying text summary  
for forecast statements.

Released Thursday, January 31, 2013

Author: Mark Svoboda, National Drought Mitigation Center

# 1951 Flood – West Bottoms, KCMO

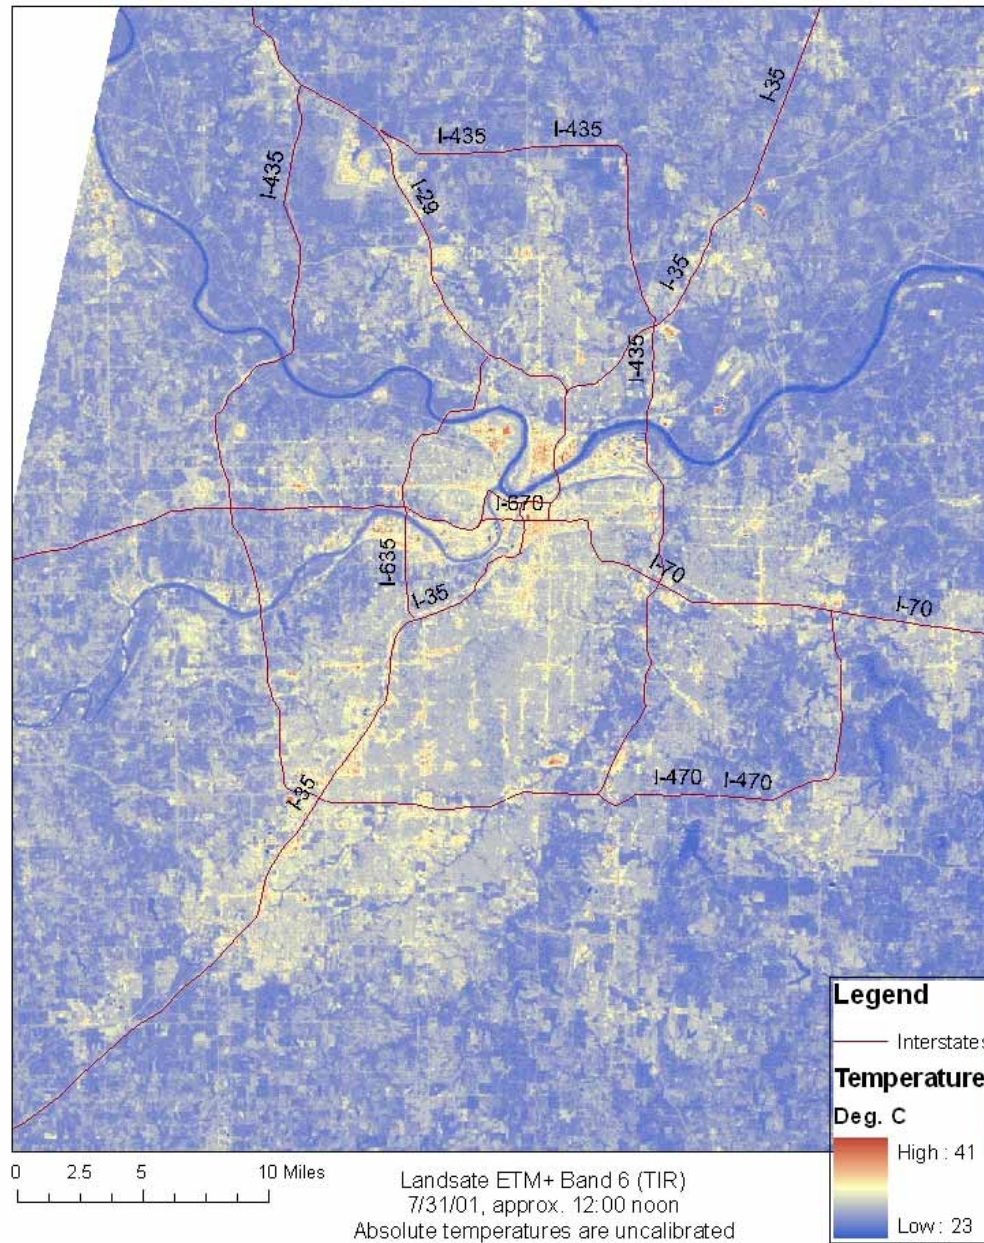

# Green Infrastructure strategies to mitigate or adapt to changing precipitation patterns

- Urban forestry
- Planning – GIS-based natural resource inventory
- Stormwater management
- Regional greenway/GI system
- Ecosystem based mitigation

# Green infrastructure and Climate mitigation/adaptation

- Urban forestry
- Planning – GIS-based natural resource inventory
- Stormwater management
- Regional greenway/GI system
- Ecosystem based mitigation

## Land Surface Temperature for Kansas City Metro Area

# Future Land Use

DRAFT January 2008.  
 Land use data is from city and county plans and 2005 appraiser's data. All recent future land use data changes may not be included. MARC has converted all local land use types to a common set of classes.

## Legend

### Future Land Use Type

- Agriculture/Vacant
- Rural Policy Area - .1 Units per Acre (UPA)
- Rural Residential - .2 UPA
- Urban Fringe - .5 UPA
- Residential SF Large Lot - 1 UPA
- Residential SF Very Low - 1.5 UPA
- Residential SF Low - 2.5 UPA
- Residential SF Medium - 5 UPA
- Residential MF Low - 8 UPA
- Residential MF Low-Med - 12 UPA
- Residential MF Medium - 15 UPA
- Residential MF High - 20 UPA
- Residential MF Very High - 30 UPA
- Protected/Parks
- Public/Semipublic (Low) - .22 Floor Area Ratio (FAR)
- Public/Semipublic (High) - .3 Floor Area Ratio (FAR)
- Commercial (Low) - .2 FAR
- Commercial (High) - .3 FAR
- Office (Low) - .25 FAR
- Office (Medium) - .275 FAR
- Mixed Use (Low) - .17 FAR
- Mixed Use (High) - .65 FAR
- Industrial/Bus. Park (Low) - .2 FAR
- Industrial/Bus. Park (High) - .24 FAR

# Stormwater Planning

# i-tree

## A regional forest assessment

---

# Regional Forestry Assessment

Feature	Measure
Number of trees	249,450,000
Tree cover	18.6%
Pollution removal	37,000 tons/yr (\$286M/yr)
Ozone removal	23,040 tons/yr (\$207M/yr)
Carbon storage	19.9M tons (\$411M)
Carbon sequestration	1.0M tons/yr (\$20.7M/yr)
Building energy reduction	\$14M/yr
Total value per year	\$320M/yr
Total value, 25 years, 10% increase in canopy coverage	\$8 billion

# POLICY AND PLANNING FRAMEWORK

<b>STRATEGY</b>	<b>REGIONAL ACTION (EXAMPLE)</b>	<b>LOCAL ACTION (EXAMPLE)</b>
<b>POLICY &amp; PLANNING</b>	<i>Plan Integration</i>	<i>Adopt Tree Protection and Replacement Ordinances</i>
<b>URBAN DESIGN</b>	<i>MetroGreen</i>	<i>Implement conservation-focused stormwater BMPs and sustainable site design</i>
<b>OPERATIONS &amp; MAINTENANCE</b>	<i>Workforce Development</i>	<i>Create public – private partnerships for tree care</i>
<b>ENGAGEMENT &amp; EDUCATION</b>	<i>Public Relations / Outreach</i>	<i>Implement Regional Tree Fund; Support Heartland Tree Alliance</i>

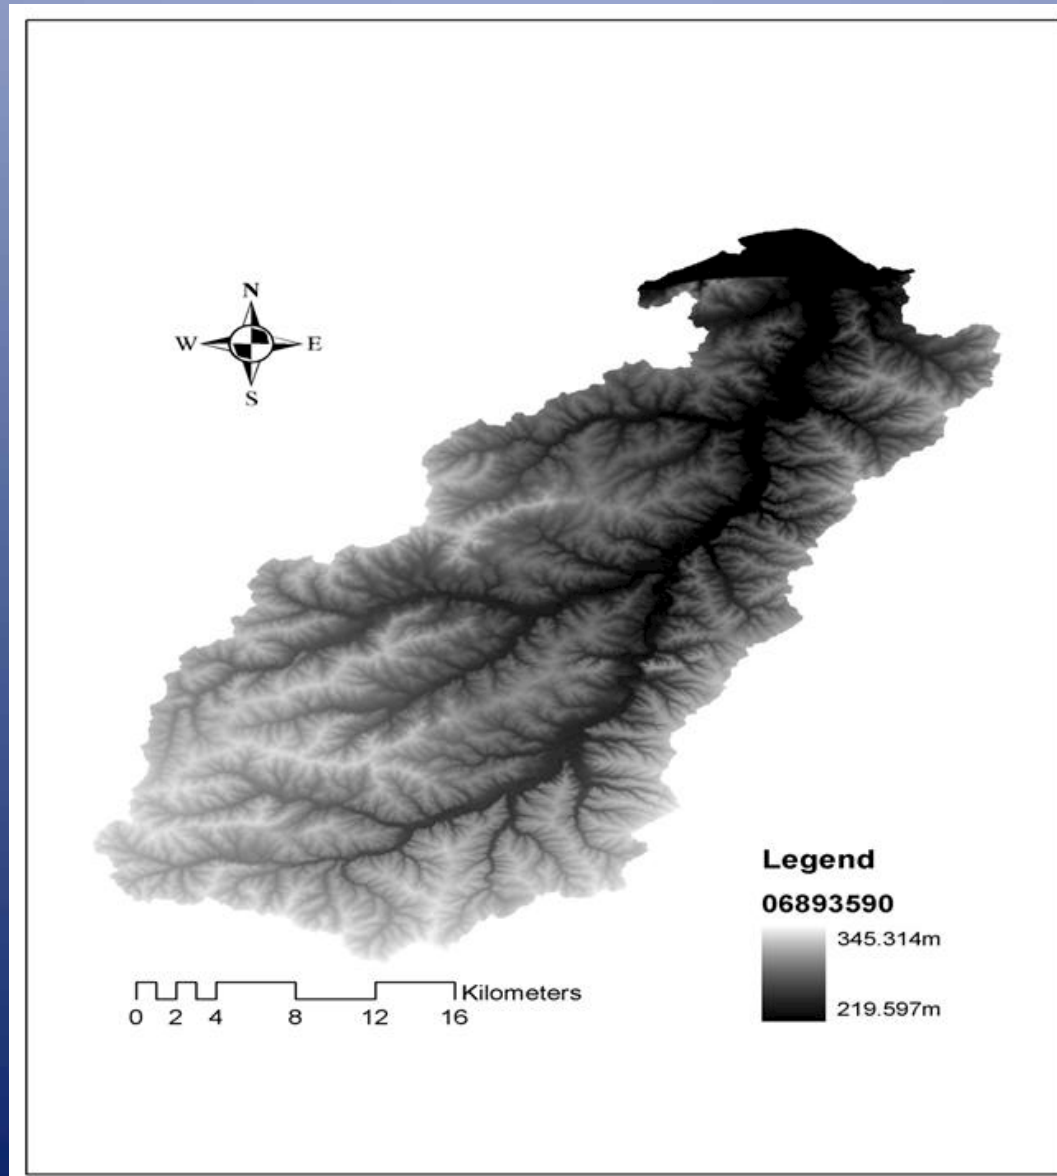

# Ecosystem Service Benefits

# Ecosystem Service Benefits

# i-tree Hydro

Changes in total flow during simulation period based on changes in percent impervious and percent tree cover. Red star indicates current conditions.

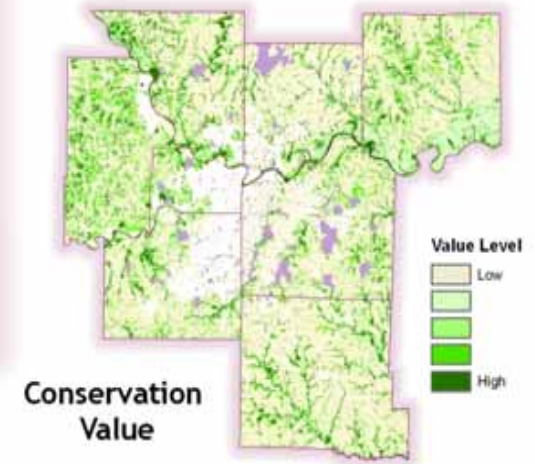

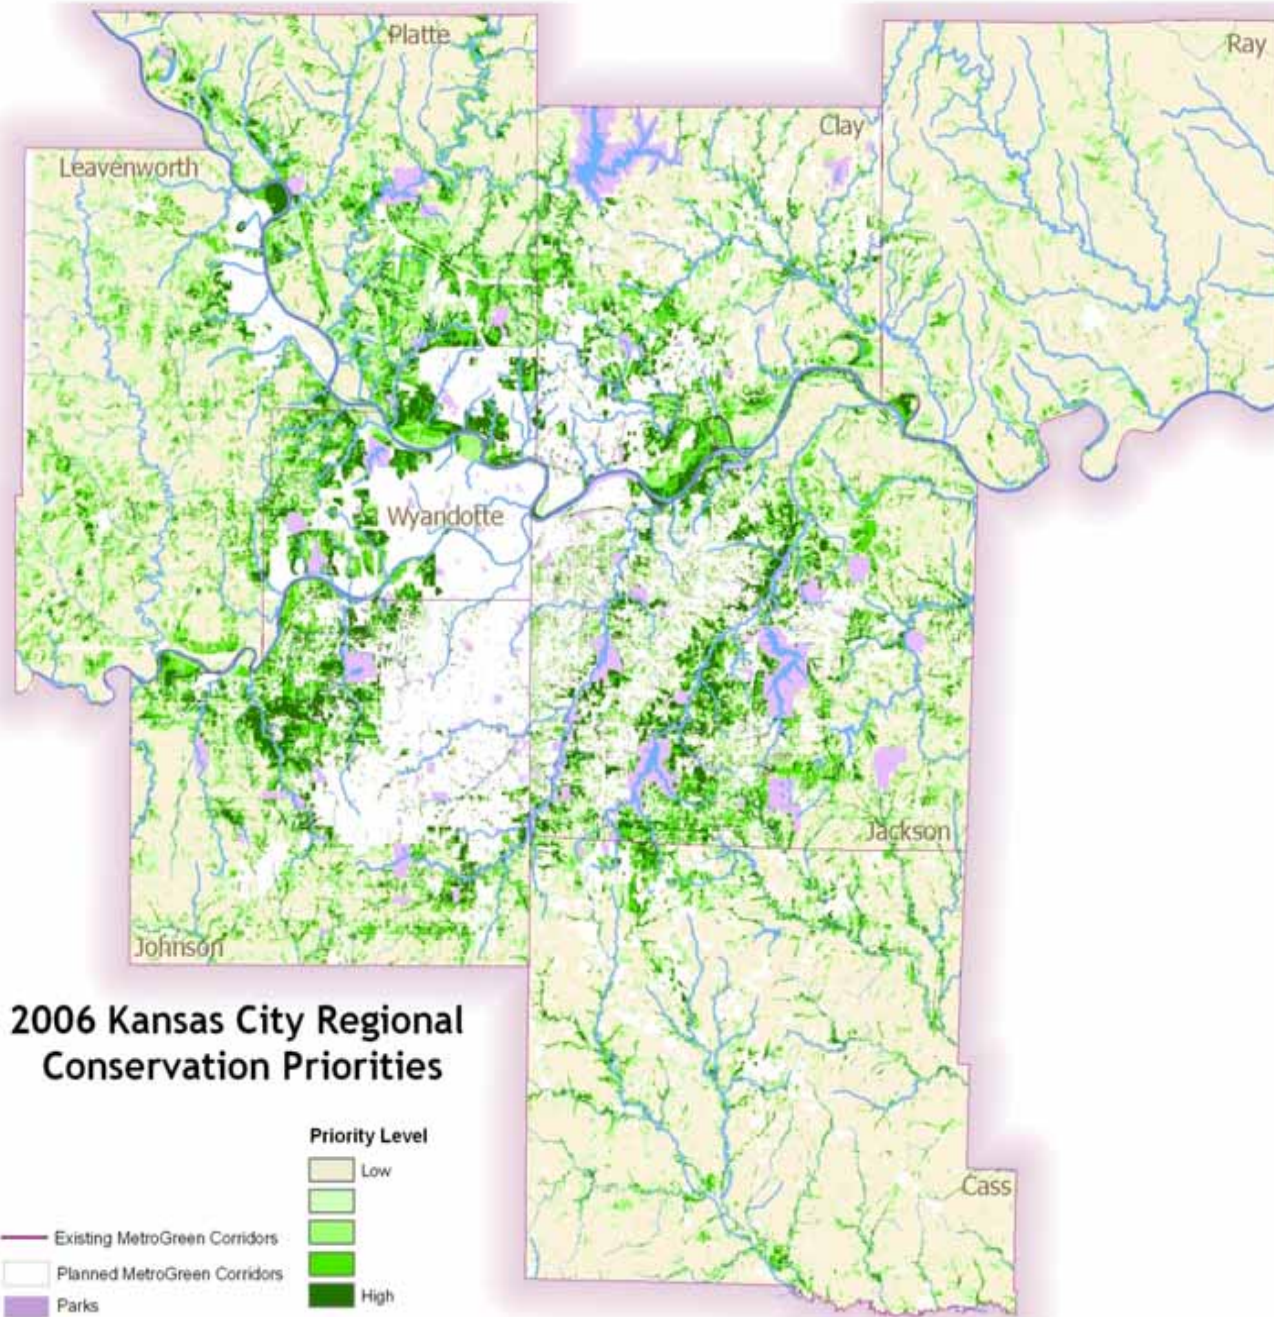

# Regional Natural Resource Inventory 1.0

Upland Resources

# Stream Buffers

Water Resources

Upland Resources

Parks

# NRI 2.0 – SPOT Imagery

- 2012 Remote sensing
- 2.5m resolution
- 11 classes
- 9 county coverage

# Subjective ecosystem valuation

- Water purification
- Water flow regulation
- Erosion control
- Air purification
- Microclimate moderation

# Ecosystem services – sample output

Level of Ecosystem Service for Ecological Land Cover Types in the Kansas City Region

# Initial applications

- Parcel-based urban forest canopy coverage
- Impervious coverage
- Ecosystem-based mitigation
- Planning and design at multiple scales
  - Site
  - Transportation or greenway corridors
  - Sub-watersheds
  - County
  - Region/Basin

# Recommendations

- Good data is fundamental
- Proactive and integrated planning
- Structural change/capacity building
- Show practical, cost effective applications
- Scaling
  - Site (complete streets, stormwater)
  - Meso-scale (corridors, watersheds)
  - Landscape scale (regional green infrastructure)

# Questions & Discussion
