Lessons Learned

- *Building a partnership is the most important step*
- *Partnerships produce partners for future projects*
- *Share goals and values, include written agreements that define roles and expectations of each partner and their commitment to the partnership.*
- *Be unified in the project message and showcase the partnership as much as possible*
- *Tour similar projects in other cities (bring elected officials, residents, property and business owners & agency representatives) to help build project ownership.*

Give credit to those that need it most!!
