South Lafourche Levee System

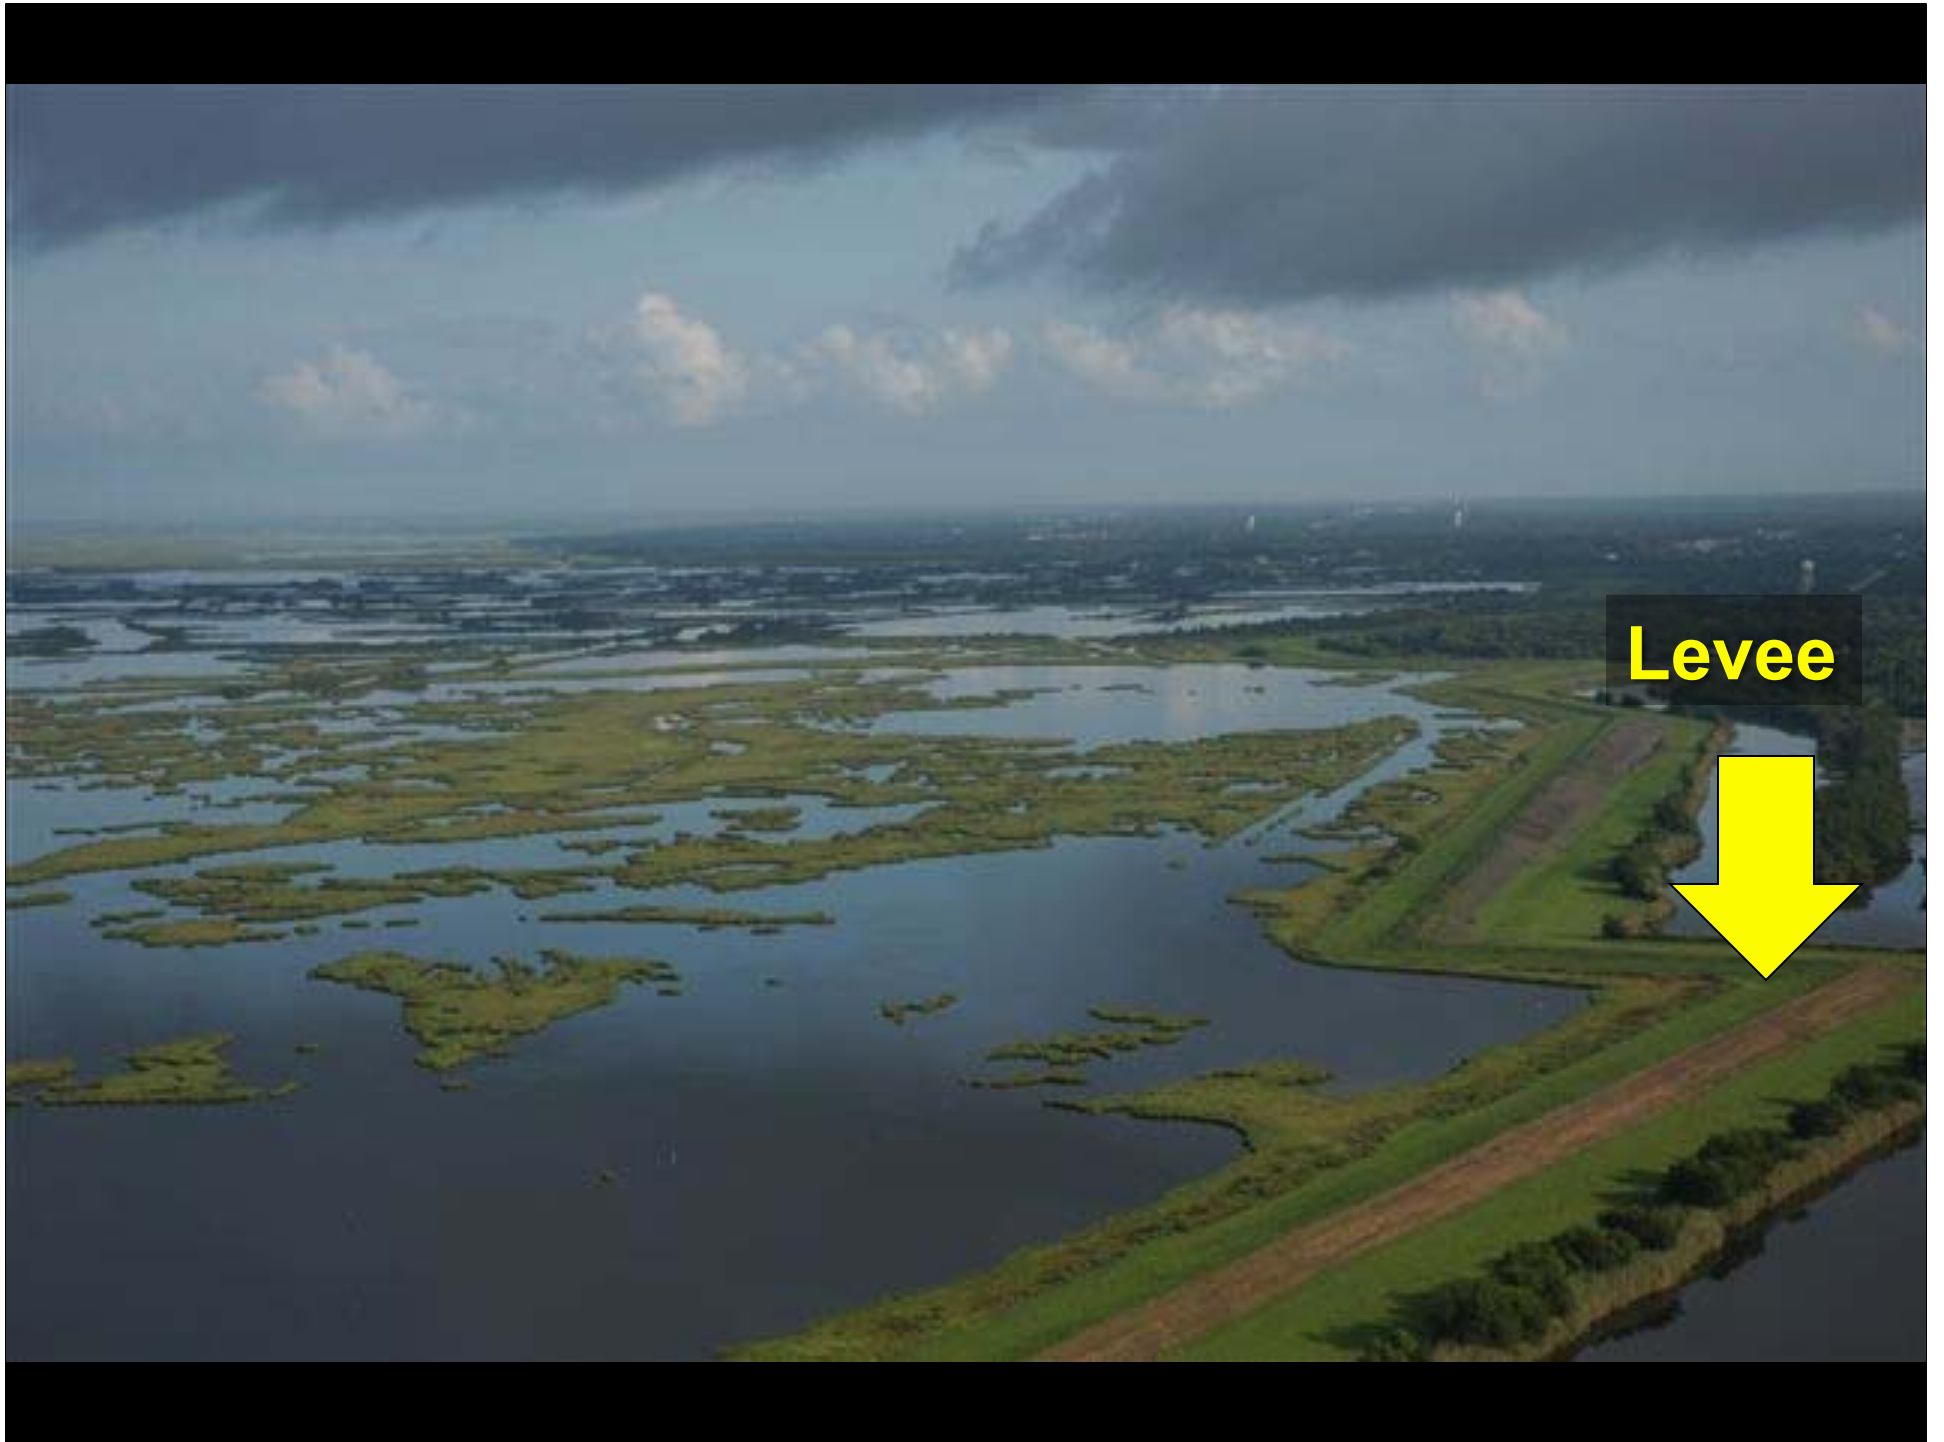

An aerial photograph showing a long, straight levee system that curves at the bottom of the frame. To the left of the levee is a river with some industrial buildings and a road. To the right is a large area of flooded land with a grid-like pattern of canals. In the background, a small town is visible along the river. The sky is clear and blue.

**Southern End of
Levee System**

An aerial photograph showing a coastal landscape. In the foreground, there's a body of water with a small pier or dock structure. A road runs along the shore, with some buildings and a parking lot nearby. Beyond the road, there's a green field or marsh area. In the background, a large body of water, possibly a bay or estuary, is visible, with a levee system separating it from the land. The text "Southern End of Levee System" is overlaid in yellow.

Outside of Levee System

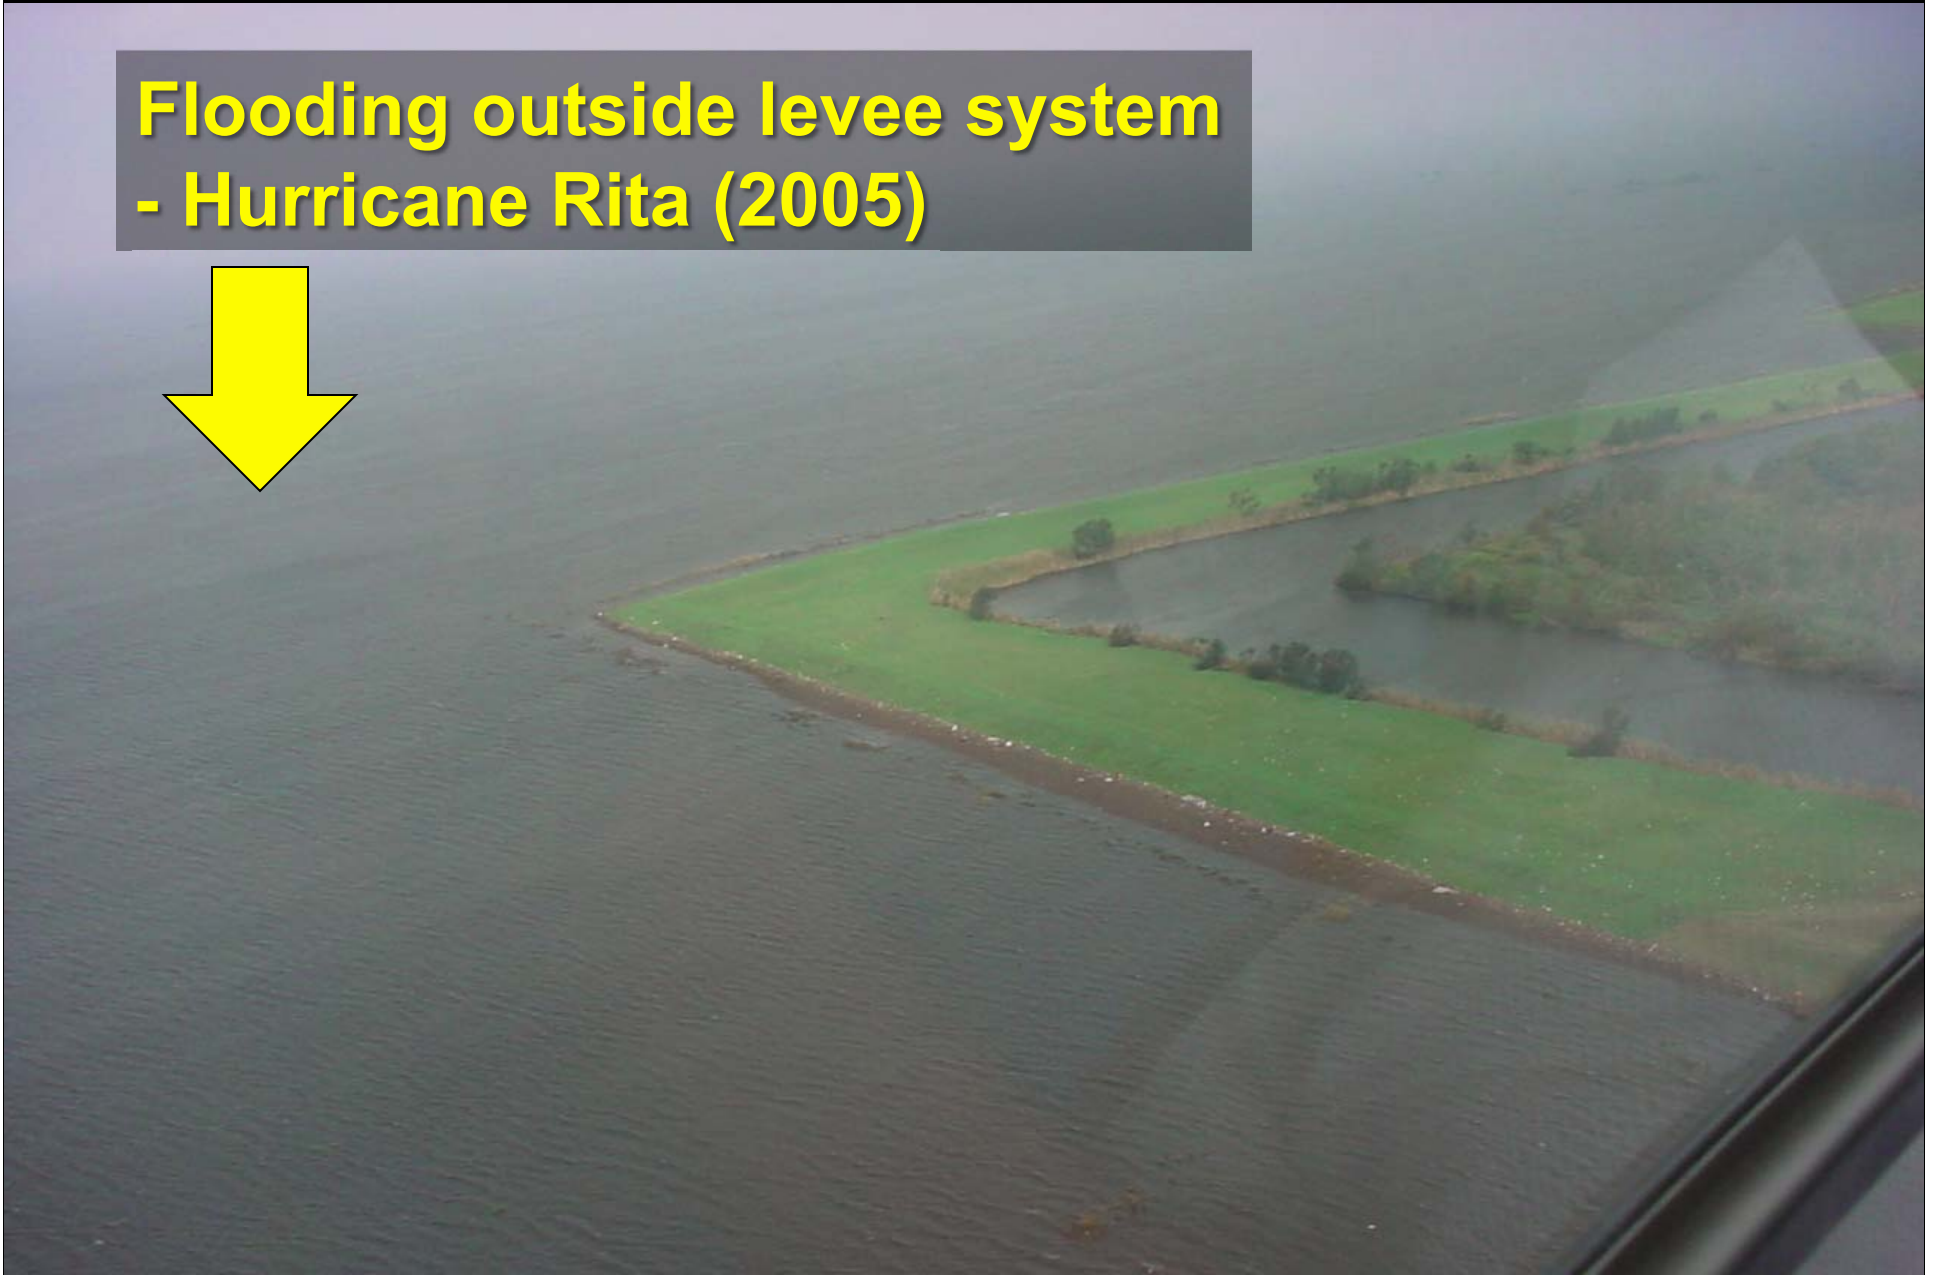

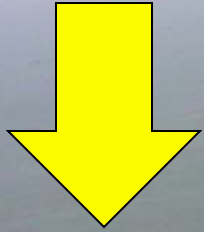

**Flooding outside levee system
- Hurricane Rita (2005)**

This aerial photograph captures the aftermath of Hurricane Rita in 2005. A large, dark, winding road runs diagonally across the lower half of the frame, with several vehicles visible. To the left of the road, a large body of water has inundated the landscape, which includes green fields and some structures. A yellow arrow points from the text box above towards the flooded area. In the background, a long bridge or causeway extends into the water. The sky is overcast, and the overall scene depicts significant flooding outside the levee system.

Houses Built at 3 Different Elevations

A photograph showing a flooded area. In the background, there is a large, light-colored building with multiple windows and a corrugated metal roof. To the left, a wooden structure is partially submerged. In the middle ground, a small white building with a teal roof and teal trim around its windows and door is partially submerged. To the right, the front of a red truck is visible, with the license plate 'TA-16'. The water is murky and turbulent. A black rectangular box with yellow text is overlaid on the lower left portion of the image.

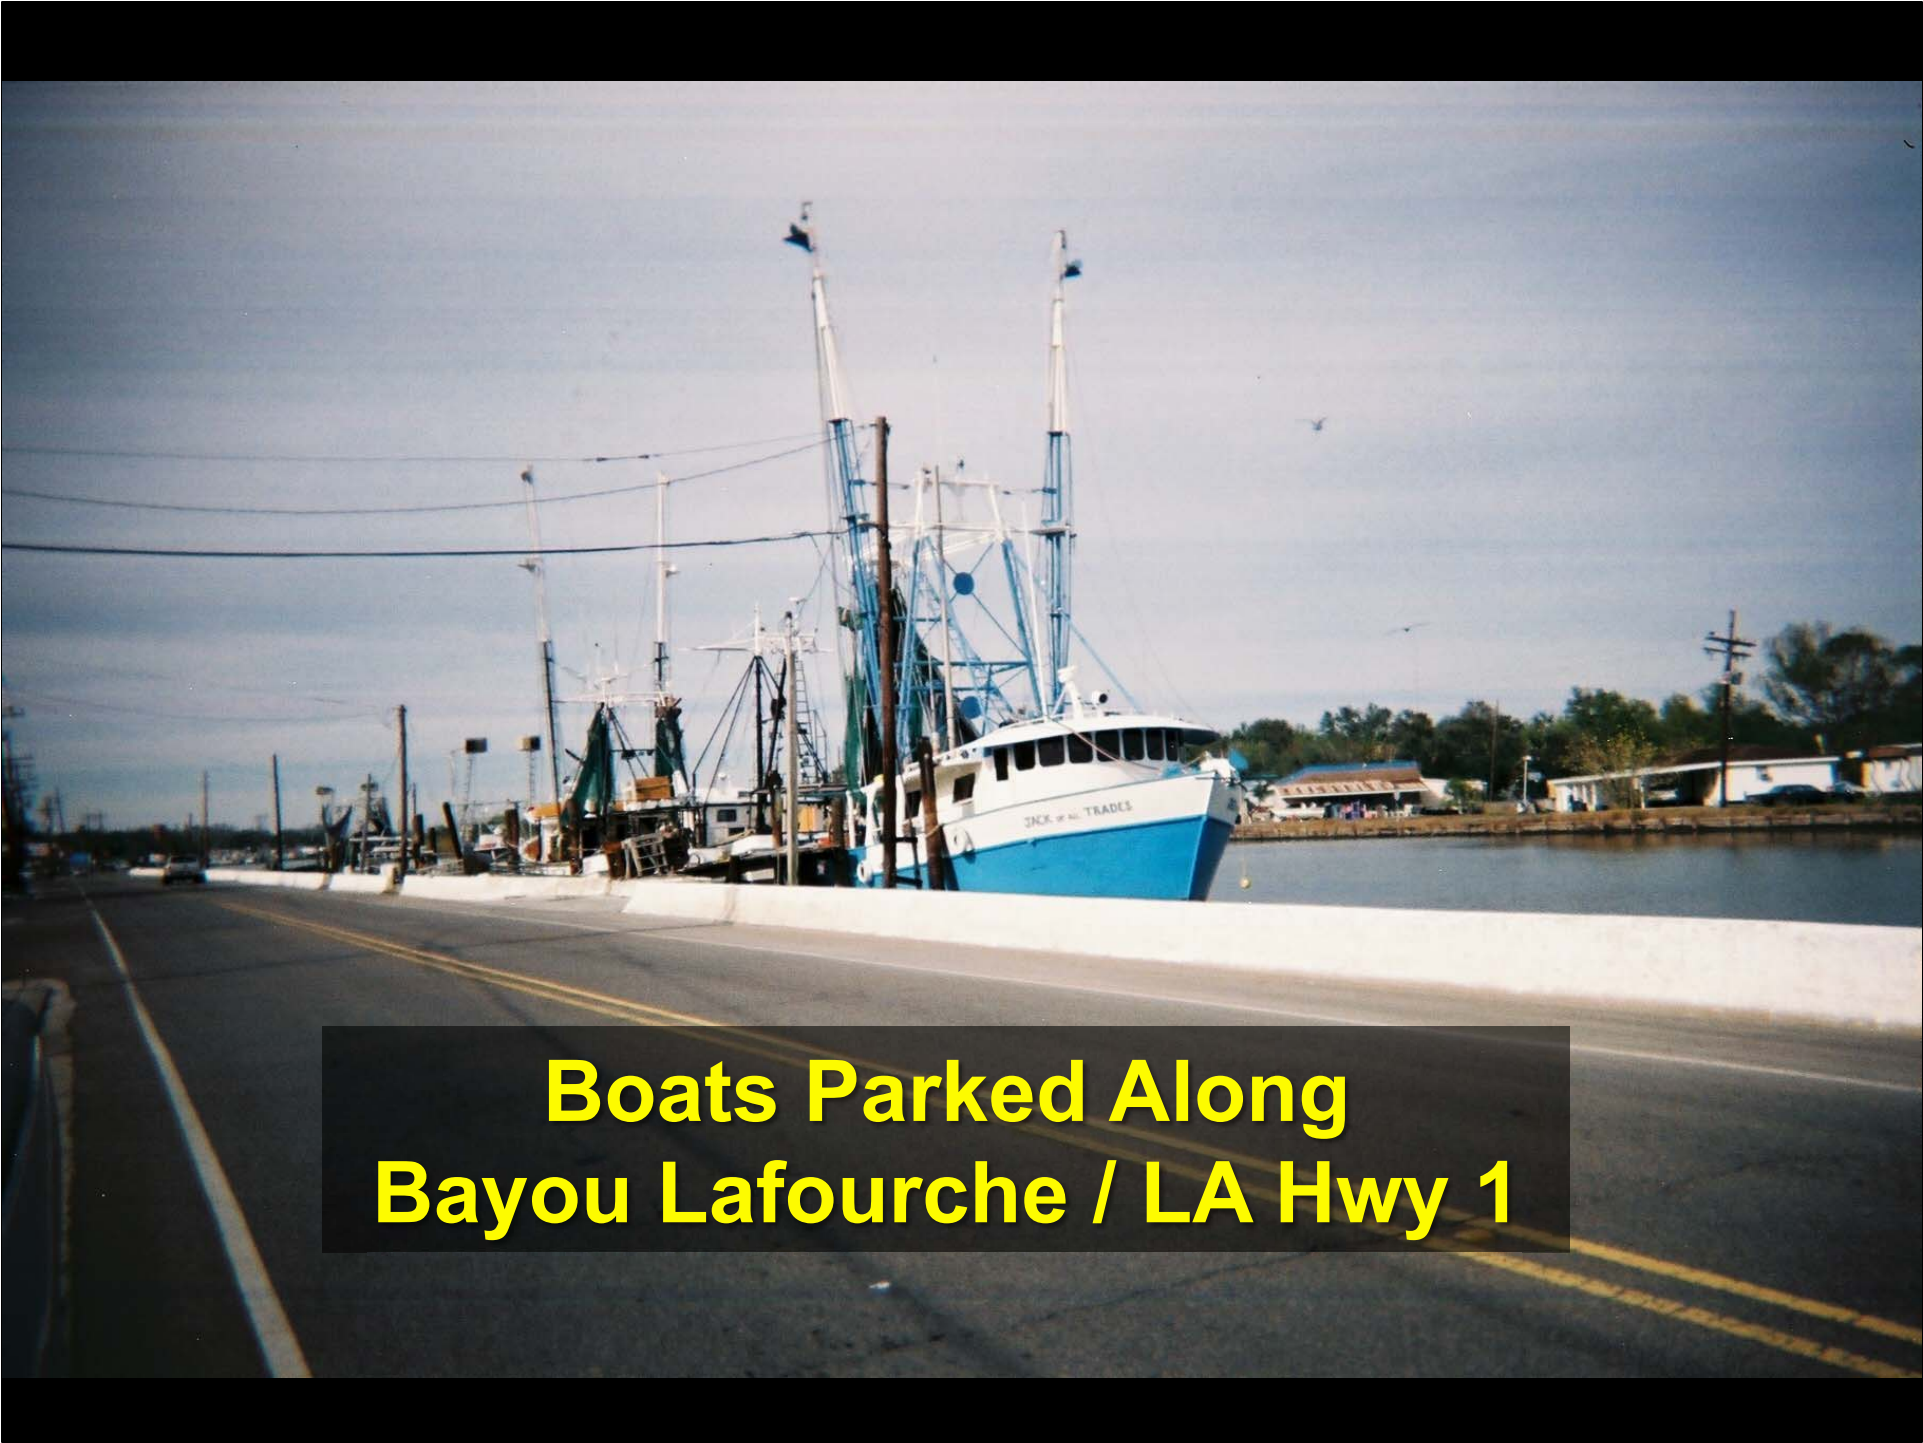

Different Elevations

A photograph showing a residential street completely flooded with murky water. In the background, there are several houses, including a light blue one with a porch and a yellow one on the right. Utility poles with power lines are visible. The sky is overcast. A black text box with yellow text is overlaid in the lower-left quadrant.
