NEW PARTNERS FOR SMART GROWTH

GREEN INFRASTRUCTURE STRATEGIES FOR COMMUNITY RESILIENCE: PLANNING, MAINTENANCE, & WORKFORCE DEVELOPMENT

Emerging Lessons from NatureWORKS: A National Urban Green Infrastructure Workforce Study
Sara Lamback | February 11, 2016
AGENDA

> Introduction to JFF
> Overview of NatureWORKS
  – The NatureWORKS Definition of Green Infrastructure
  – Goals and Actions to Date
> Characteristics of the “GI” Workforce
> GI Installation and Maintenance Occupations
> Key Findings and Takeaways
> Discussion and Questions
ABOUT JOBS FOR THE FUTURE &
THE NATUREWORKS STUDY
HOW JFF WORKS: SCALING SOLUTIONS

Develop Evidence-Based Innovations

Build Systems and Field Capacity

 Advocate and Influence Policy

ALIGNMENT ACROSS SECONDARY—POSTSECONDARY—WORKFORCE

NatureWORKS is a national urban green infrastructure workforce study. It aims to better understand urban green infrastructure jobs and careers.

NatureWORKS is funded through the USDA Forest Service Urban and Community Forestry Challenge and the Kresge Foundation.
This study aims to:

> Analyze green infrastructure (GI) activities and related public and private employment in select cities

> Analyze traditional and real-time labor market data to understand employment trends in GI industries

> Identify wages of GI jobs and compare to related industries

> Identify promising strategies for expanding GI employment in both the public and private sector
Ann Arbor, MI
Austin, TX
Charlotte, NC
Denver, CO
Lincoln, NE
Portland, OR
CHARACTERISTICS OF THE GI WORKFORCE
HIGHLIGHTS FROM RESEARCH IN LINCOLN, NE
THE GI WORKFORCE: LINCOLN

- Consulting Engineers
- Landscape Architects
- Existing Contractors (Landscaping, Tree care, Excavation, Nurseries, Pavement, Horticulture, Construction, Water and Sewer)
- City Staff
  - Inspectors
  - Maintenance
  - Arborist
  - Engineers
  - Naturalists
  - Environmental Specialists
  - Planners
Design of GI projects has generally been effective

Local contractor bids are rising

Lincoln is considering a certification for the construction and maintenance of GI projects

Currently, the maintenance of GI projects is the biggest concern
STORMWATER REGULATORY DRIVERS: LINCOLN

- Floodplain and detention requirements
- New growth area standards
  - No net increase in flow/elevations
  - Minimum corridor standards
  - Compensatory storage requirements
- Stormwater Quality Requirements
  - Effective February 1, 2016
  - Maintenance plan required
Use simpler planting plans

Engineered soil mix (50/50 compost and sand) is particularly effective

Build Best Management Practices last

Create separate contracts for plantings with two years of maintenance

Plan training for construction and maintenance
GI INSTALLATION & MAINTENANCE OCCUPATIONS

KEY TAKEAWAYS
Many cities already have a vibrant public and private workforce that is (theoretically) well positioned to take on expanded green infrastructure work.

Contractors and public employees need additional training on GI installation and maintenance.

Many GI installation and maintenance jobs require little formal education beyond high school.

National and local efforts are underway to establish GI workforce and site certifications (Water Environment Federation, Center for Watershed Protection, Sustainable Sites).

Some GI occupations have certifications of increasing value (e.g., green roofs, pervious pavement, arboriculture).

Tracking development of Asset Management Plans and Best Management Practice (BMP) manuals is a strategy to track changing workforce needs.

A healthy market niche for specialty GI contractors, including community-based social enterprises, and volunteer/service corps organizations already exists.

Equity issues in entry-level GI jobs require contracting tools like resident, minority, and female employment goals; M/WBEs; and contracts with community groups.

Opportunities for integrating installation and maintenance of stormwater, watershed, climate change resilience, and “traditional” green infrastructure are being missed.
QUESTIONS/COMMENTS
See the NatureWORKS Website:

- [http://www.jff.org/initiatives/natureworks](http://www.jff.org/initiatives/natureworks)

We regularly publish interviews, guest blogs, and other information on the GI workforce through the JFF blog:

- [http://www.jff.org/blog](http://www.jff.org/blog)

Please email Sara Lambback if you would like to receive emails and other updates on NatureWORKS!
